

The latest in Condensing Technology Introducing the 26 eco+

The most energy efficient gas hot water system.

October 2008 Robert Bosch Australia

- ▶ 6.9 star energy efficiency
- 26 litres per minute
- Secondary heat exchanger for maximum efficiency
- In-built Neutraliser for safe release of condensate

Bosch Hot Water is proud to introduce the most energy efficient gas hot water system - the 26eco+

Why Choose Condensing Technology?

The Bosch 26^{eco+} gas hot water system is a high-efficiency, fully-condensing appliance. Unlike traditional hot water systems, a condensing unit captures heat from the exhaust gas and uses it to preheat the incoming cold water, making the 26^{eco+} the most energy efficient gas hot water system on the market.

Features:

- Condensing Technology
- 6.9 star energy efficiency rating
- 26 litres per minute
- Secondary heat exchanger for maximum efficiency
- Neutraliser for non-acidic condensate
- Install up to 4 temperature controllers
- Ideal for 2 3 bathroom homes
- Available in Natural or LP Gas

Press Release

Did you know? The average household produces almost 12 tonnes of greenhouse gas per year from energy used in the home. The average car produces four tonnes of greenhouse gas every year[^]. A conventional electric hot water system produces seven tonnes of carbon dioxide emissions per year, so switching to a Bosch 26^{eco+} gas hot water system is equivalent to taking one and a half cars off the road for an entire year!^

October 2008 **Robert Bosch** Australia

BOSCH

^ Carbon emissions based on average Victorian consumption. Averages may vary in other regions. Information obtained from Sustainability Victoria.

Neutraliser for Non-Acidic Condensate

When heat from the exhaust gas is collected within the secondary heat exchanger, condensation occurs from moisture in this exhaust gas, and the resulting water is discharged from the drain pipe. The Bosch 26eco+ has a neutraliser that is specifically designed to transform this acidic condensate into a neutral and environmentally friendly emission.

Don't forget to team your energy efficient 26eco+ with Bosch Premium and Sub controllers to allow precise control of water temperature in the kitchen, bathroom, en suite and laundry.

Marketing Coordinator www.bosch.com.au/hotwater The Bosch Group is a leading global supplier of technology and services. In the areas of automotive and industrial technology, consumer goods, and building technology, some 271,000 associates generated sales of 46.3 billion euros in fiscal 2007. The Bosch Group comprises Robert Bosch GmbH and its more than 300 subsidiaries and regional companies in roughly 50 countries. This worldwide development, manufacturing, and sales network is the foundation for further growth. Each year, Bosch spends more than 3 billion euros for research and development, and applies for over 3,000 patents worldwide. The company was set up in Stuttgart in 1886 by Robert Bosch (1861-1942) as "Workshop for Precision Mechanics and Electrical Engineering."

The special ownership structure of Robert Bosch GmbH guarantees the entrepreneurial freedom of the Bosch Group, making it possible for the company to plan over the long term and to undertake significant up-front investments in the safeguarding of its future. Ninetytwo percent of the share capital of Robert Bosch GmbH is held by Robert Bosch Stiftung GmbH, a charitable foundation. The majority of voting rights are held by Robert Bosch Industrietreuhand KG, an industrial trust. The entrepreneurial ownership functions are carried out by the trust. The remaining shares are held by the Bosch family and by Robert Bosch GmbH.
